THE ESSENTIALS

Convert-a-link

Convert-a-link is the quickest and easiest way to monetise your content. Convert-a-link switches normal product links on your website into affiliate links with little effort. To find out more or to convert your own links, select 'Convert-a-link' from the 'Links & Tools' drop down of the interface.

Convert-a-Link

1 Switch on Convert-a-Link

To get started, switch on the Convert-a-Link functionality. Or to deactivate, simply switch off.

Convert-a-Link ☒

2 Add Javascript

Copy and paste the below Javascript at the bottom of the body element of each web page. All direct and product links will convert to affiliate links automatically. Link will appear normal to the users.

```
<script src="https://www.dwin2.com/pub.45628.min.js"></script>
```

or [download Wordpress plugin](#)

3 Start earning commission

Once integrated, the javascript will convert your normal links (such as www.vodafone.com) into tracking links, without them changing their appearance to your website visitors. If you have links to retailers that you have not joined up to, we will automatically sign you up to their affiliate programme and upon approval, you will be able to earn money with them.

How to test that convert-a-link is installed properly

To test that convert-a-link is installed and working correctly on your website, create a link to <http://convertalinktest.awin.com> (on a page where you have installed convert-a-link). Click on the link and if convert-a-link is working, you'll be directed to a success page.

If you are directed to a error page, please double check the implementation by following the installation guide [here](#) and try again. Once you switch on, please allow up to 5 minutes for convert-a-link to be activated.

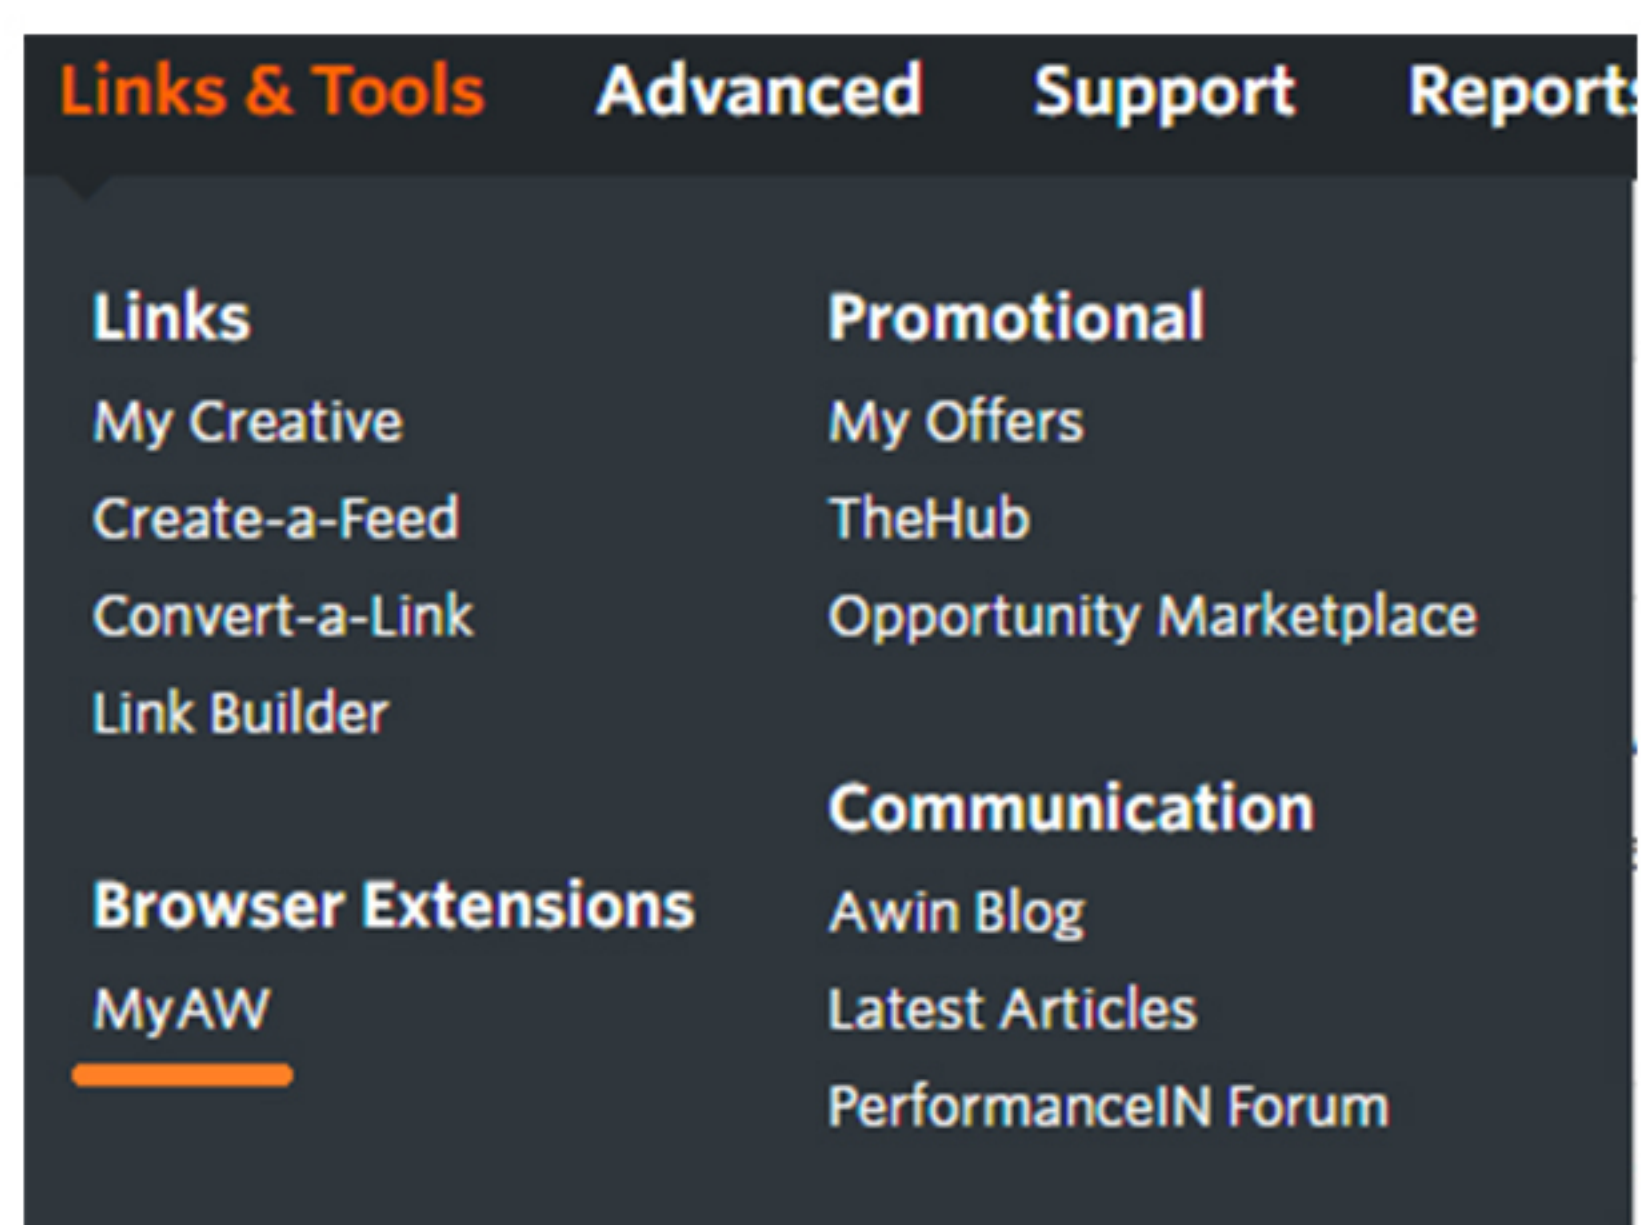

ADDING AFFILIATE LINKS TO YOUR WEBSITE DEEPLINKS

Through this deeplink Awin can identify whether the traffic that you send to PrettyLittleThing.com results in a sale and if so, their system calculates the amount of commission that should be rewarded to you for that successful sale.
